I've created an app using Ruby and the Zencoder Framework and would like to release it with the RubyGem package name Zencoder. I've installed the gem and created a zencoder.rb file that can be started and stopped by the shell. I've also added this line to the zencoder.rb file in the main application: require 'zencoder' When I attempt to run the command: sudo rails generate zencoder I get the following error: Could not find generator zencoder.
